

Web Booking

FREJA

WHAT IS WEB BOOKING?

Web Booking is part of our Road e-service portal and allows you to book your transports with FREJA, track the transport in T&T, print documents, and collect PODs (Proof of Delivery).

HOW DOES WEB BOOKING WORK?

FREJA's web booking is a web platform where you, as a customer, can log in and enter your bookings.

This means that you can enter bookings without the need to build an integration between your system and ours.

After logging in, you have the option to enter your shipment data and create bookings with FREJA.

The portal provides an excellent overview of your shipments with T&T status, and the ability to print and upload documents will help optimize your business.

The portal is open day and night, and you are welcome to sign up for our Road e-service, even if you only want to have an overview of shipments booked through other FREJA solutions.

WHO IS WEB BOOKING FOR?

Web booking is for all clients who want to book consignments electronically in a portal. The solution can also be used for integrated customers who sees the benefit of having a comprehensive view of their FREJA transports.

WANT TO GET STARTED?

Contact us, and we will create a login for you and guide you through the process.

BENEFITS

24/7 access

Follow your shipments

Print & upload documents

Easy and intuitive
